

1. Data Variable Use Korte Nished Kora hoychilo . But I laramin3 Data Vaiaable Use Kora Hoyche Onake Jaiga.(**SiteController**)

2. return view Te Compact kore vaiaable pass koar kotha chilo. (**Sitecontroller**)

3. Refactor DepositController .

```
public function approve(Request $request)
{
    $request->validate(['id' => 'required|integer|exists:deposits,id']);
    $deposit = Deposit::where('status',2)->first();
    $deposit->status = 1;
    $deposit->save();
}
```

4. Issue. fallback(**PageBuilderController**)

```
public function managePagesDelete(Request $request){
    $page = Page::where('id',$request->id)->first();
    $page->delete();
    $notify[] = ['success', 'Delete Successfully'];
    return back()->withNotify($notify);
}
```

5. Jhokon User Profile Update Kortechi Country name kothy ooo input nitechhi but hidden country name nitechhi . aita tu dorkar portechhe na.

```
$user = Auth::user();
$request->validate([
    'firstname' => 'required|string|max:50',
    'lastname' => 'required|string|max:50',
    'address' => "sometimes|required|max:80",
    'state' => 'sometimes|required|max:80',
    'zip' => 'sometimes|required|max:40',
    'city' => 'sometimes|required|max:50',
    'image' => 'mimes:png,jpg,jpeg'
],[
    'firstname.required'=>'First Name Field is required',
    'lastname.required'=>'Last Name Field is required'
]);
$in['firstname'] = $request->firstname;
$in['lastname'] = $request->lastname;

$in['address'] = [
    'address' => $request->address,
    'state' => $request->state,
    'zip' => $request->zip,
    'country' => @$user->address->country,
    'city' => $request->city,
];
```

6. Big Integer (20) Onake Server Support kore na.

7. RegisterController Agree refactoring.

```
        'country_code' => 'required',
        'country' => 'required',
        'agree' => 'accepted'
    ],
```

8.Support Message label message column none.

name	type	Length/values	Default	Column
message	LONGTEXT		None	util

Pick from Central Columns

Minimum 1 capital letter is required

Minimum 1 small letter is required

Minimum 1 number is required

Minimum 1 special character is required

Minimum 6 characters

9.Withdraw Method. Minimum Amount must be lower maximum amount.

Range

Minimum Amount *

21

USD

Maximum Amount *

12

USD

10.Withdraw Method: **User Data Client Side Required but server side not validate.**

fsdf	Input Text
Field Name	Input Text
fsdfsd	Input Text

Same Problem Manual Deposit

Range

Minimum Amount *

USD

122

Maximum Amount *

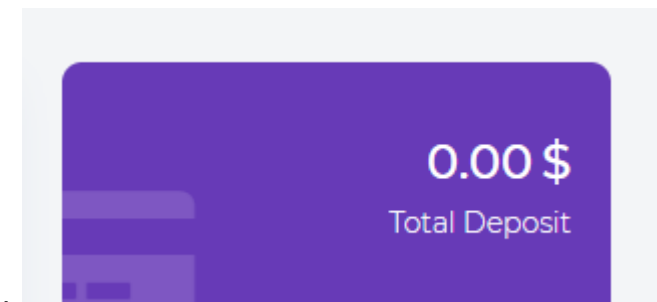

USD

12

11 Admin Panel User Details Number_format Use.

```
ails">
"numbers">
class="amount">{{number_format($totalWithdraw,2)}}</span>
class="currency-sign">{{__($general->cur_sym)}}</span>
```

12 . Symbol Must Be balance Before.

13. Admin Dashboard Query Optimize.

Messages

Timeline

Exceptions

Views 7

Route

Queries 27

Models 58

Mails

Gate

27 statements were executed, 8 of which were duplicated, 19 unique

```
select * from `admins` where `id` = 1 limit 1
```

```
select count(*) as aggregate from `users`
```

14.Admin Panel Notifications Query Optimize.

The screenshot displays a web application interface. On the left is a dark blue sidebar menu with the following items: Dashboard, Manage Users (with a purple exclamation mark icon), Payment Gateways, and Deposits (with a purple exclamation mark icon). The main content area has a light blue header with the title 'Notifications'. Below this header, there are two notification cards, each with a circular profile picture placeholder labeled '350x300' and the text 'New support ticket has opened' followed by '1 hour ago'. Below the notifications is a horizontal bar with several tabs: Messages, Timeline, Exceptions, Views (with a red badge showing '8'), Route, Queries (with a red badge showing '32'), Models (with a red badge showing '53'), Mails, Gate, Session, and Request. Below the tabs, a status bar indicates '32 statements were executed, 15 of which were duplicated, 17 unique'. At the bottom, a SQL query is shown in a text area: `select * from `admins` where `id` = 1 limit 1`.
